GARDEN PRODUCTS

**As we celebrate our 100th anniversary, we would like to extend our heartfelt gratitude to our valued customers and vendors for their devoted partnerships. DeVroomen would not be where we are today without the unwavering support from our customers and vendors, as well as the dedication of our employees. In honor of this milestone, we're thrilled to introduce 'Marcy', our Centennial Blend, a special collection embodying the essence of a century-long journey. This unique blend reflects our commitment to excellence and innovation as we step into the next century of service.**

## **Why Choose DeVroomen?**

Our products are grown by carefully selected contract growers. Our world-renowned Dutch bulbs are of the highest quality and very competitively priced. Whether you're in the USA or in Canada, our experienced sales team is ready to assist with projects of any scale. Our team has you covered from coast to coast!

## **Marketing Excellence and Custom Services:**

Our commitment goes beyond delivering flower bulbs - we offer personalized services tailored to your needs. Orders can be packed and labeled according to your job, PO, or location. We provide pre-mixed blends from our

program or create custom blends exclusively for you. Our marketing resources, including comprehensive catalogs, vibrant sales flyers, a non-branded web site, and a rich image database are at your disposal to enhance your sales.

## **On Our Cover:**

Introducing one of our latest additions to the blend program, 'Marcy'. A wonderful combination of three varieties, Sun Lover, Double Negrita and Purple Dream. Sun Lover is what sets this combination apart, the varying colors from solid yellow to orange to red gives the appearance of several varieties, not just three. We were amazed when we saw this and we think you will be too. 'Marcy' is named after Marcy Simbro-Woodhouse who has worked for the City of Pella, Iowa for 17 years and has planted over 400 different varieties of tulips. Marcy holds a Bachelor's Degree in Horticulture from Iowa State University. Marcy also created our Chic Lady and Paradise Found blends. Although tulips make up a majority of the palette, she is also known for mixing a variety of daffodils, hyacinth and fritillaria as well.

Sincerely,  
**The DeVroomen Sales and Customer Service Team**

## Guide for estimating quantity of bulbs needed

This guide is a reference only, for more intense displays or beds that will be mostly viewed from a short distance, adding more bulbs per square foot (perhaps even doubling the amount) is recommended.

### Square or rectangular beds:

width x length x number of bulbs per square foot  
= number of bulbs needed to fill space.

### Round beds:

radius<sup>2</sup> (1/2 diameter of the circle<sup>2</sup>) x 3.14  
x number of bulbs per square foot  
= number of bulbs needed to fill space.

## Daffodil Paperwhite

These bulbs are excellent for  
indoor 'scaping'. The indoor  
daffodil has a sweet fragrance.  
The bulbs can be grown in  
bowls with pebbles or soil, but  
the blooms will last longer when  
grown in soil. After planting the  
bulbs need a 10 week cold period  
at 40° / 48°F. After this store  
the bulbs warm at 20°c / 68°F.  
Excellent for outdoor planting in  
zones 7 and warmer.

## Guide for estimating quantity of bulbs needed

This guide is a reference only, for more intense displays or beds that will be mostly viewed from a short distance, adding more bulbs per square foot (perhaps even doubling the amount) is recommended.

### Square or rectangular beds:

width x length x number of bulbs per square foot  
= number of bulbs needed to fill space.

### Round beds:

radius<sup>2</sup> (1/2 diameter of the circle<sup>2</sup>) x 3.14  
x number of bulbs per square foot  
= number of bulbs needed to fill space.

# Why De Vroomen Garden Products?

## A broad and deep collection of proven landscape varieties

The De Vroomen Garden Joy landscape program consists of 250+ carefully selected varieties. Tulips and Daffodils are by far the most popular varieties in our landscape line-up but at De Vroomen Garden Products we also offer a large variety of specialty bulbs. Varieties like Allium, Scilla and Fritillaria are becoming more popular because they will offer your customers a special and different landscape display. Please contact us with any special requests for items that are not listed in our catalog. We will be glad to source the varieties you need.

### Premium Bulb Sizes

We offer our bulbs in different sizes, but overall, we focus on bigger, premium bulbs. The bigger the bulb the better the result and at De Vroomen quality comes first. Bulbs are measured by their circumference in centimeters. For instance, a bag of 12/ + cm tulips consists of bulbs with a circumference of 12 cm or larger.

### Packing and delivery by job name

We can pack your orders by job name. Just send in a PO per project and you will receive your bulbs packed accordingly. This will save you a lot of time and money sorting out your delivery. We pack our bulbs in mesh landscape bags. Each bag has the variety, size and amount of bulbs imprinted. We also register the production number which allows us to track each bag of bulbs back to the grower. A valuable instrument to increase quality year after year.

## Production and Quality Control

Everyone at our company will make sure we provide you with the best possible quality flower bulbs. De Vroomen Garden Products is known for delivering healthy, true-to-name and true size products. Because De Vroomen takes quality seriously, we are a member of the Holland Selection organization. Being a member of this organization, we guarantee:

- the highest quality flower bulbs;
- supreme flowering, provided the instructions on the package are followed;
- healthy bulbs upon delivery;
- that the variety, color and size of the bulbs agree with what is stated in our catalog;
- proper handling of customer complaints;
- tracking and tracing from grower to consumer in order to improve our quality and customer service.

Our products are packed in a state of the art production facility in Lisse, Holland. The independent Dutch Flowerbulb Inspection Service conducts inspections during the production process and thereafter. As well as using independent inspectors, we also have our own staff members to monitor quality, packing of your bulbs and paperwork. They use modern scanning technology for early detection of diseased bulbs, special counting and packing machines for premium packing and a professional logistical system for order picking.

Nothing brings attention to commercial signage and properties like spring bulbs. When the world around us is drab and dreary, bulbs act like a laser light to focus people's attention to that signage your customers paid so much money for to attract attention.

**Yes, as it increases visibility,  
it will  
increase your profits!**
